

Fleet trainers required for all classes of vehicles

Strategic Analytics Team is currently working with clients who may have a requirement for fleet training in a number of locations across the UK as well as overseas including Europe, Middle East and Asia Regions.

To meet our expectations, we would expect you to demonstrate a track record in fleet training, with a focus on driver behaviour.

- 1) Be Registered ADI with a Fleet Qualification
- 2) Have 5 Years' experience of training in a fleet environment with documented evidence of this
- 3) Hold certificates for the relevant class of vehicle

To apply you need to send your CV along with a statement of how you use driver behaviour techniques as part of your overall training. These should be sent to

driverhr@strategicanalyticsteam.com

Stating that you are "interested, or please view my profile, liking this post" WILL NOT be treated as an application. Recruitment Agencies are not required and we will never ask you for any fees.

For work outside of the UK you will need to hold a current Oil and Gas Fitness to Work Certificate, this should not stop you from applying.

Applications are welcome from trainers in any country provided you have the legal right to live and work in that country.
